

Large Generator Interconnection Joint Operating Committee Meeting

Date: November 10, 2009 Time: 9:00 - 11:00 AM PST

Location: Live Meeting/Conference Call

Transmission Services

Conference Bridge: 360-418-8001 Pass Code 5757

Subject: Post Implementation Demo and Discussion on Operational Controls for Variable Generators (DSO 216)

A live meeting will be held for Wind Plant Operators to discuss post implementation issues associated with "Operational Controls for Variable Generators" wind initiative. On October 1st, the final Dispatchers Standing Order (DSO) 216 was implemented and all wind plants are currently required to have telemetered communication links in place to receive data from BPA on the status of balancing reserves and actions required.

An external BPA Web Application, iCRS Generation Advisor, is also available as a supplement to the telemetry for wind plants to receive information and signals that would otherwise be sent directly to the plants.

BPA will post a draft of a document describing Strike Assessment Criteria for comment from 11/6 through 11/20. BPA will provide an overview of the Strike Assessment Criteria during the 11/10 JOC Live Meeting and we expect to finalize the criteria by 12/4. BPA will also identify how the responses to any October /November 2009 events will be treated at that time.
