Failure to Comply

September 22, 2009

Failure to Comply Business Practice

- The new Failure to Comply Business Practice is now posted and will go into effect on October 1, 2009.
- The revised penalty rate of \$1,000 MW-hour will go into effect at the same time.
- BPA is now calculating and billing FTC penalties under the current (FY2008-2010) Rates at \$100 per MW-hour.
- We are still experiencing some failures to modify generation output when e-Tags are cut (Energy Profile reduction).
- If you have any questions about the penalty rate or how it is applied, please contact your Transmission AE.

Failure to Comply Business Practice

Generators have 10 minutes to fully modify generation output to stay within curtailment or dispatch order limits. Several customers have asked that we clarify when the 10-minute clock starts ticking. We propose to insert a sample E-Tag into the BP, showing a curtailment and indicating the later of the two times circled on the example.
